

## Peace in the world is the basic unity of life

Peace is when everyone has  
love, affection, health, good food, clothing,  
when there is well being.

Peace is taking care of the world where we live,  
the water we drink,  
the air we breathe.

Peace is when there is harmony among people,  
is knowing how to deal with our problems,  
with our difficulties.

When there is peace,  
there is everything.
